Bernie & LaDell Yada - 2006 Toyota Avalon

While this 2006 Toyota Avalon may not be destined to become a classic anytime soon, it has become a most dependable "ride" for us. We bought it in 2006 when James Toyota was still in business in Moses Lake. This car is very easy to get in and to get out of! The rear seat back "reclines" so the back seat driver is always comfortable. The snappy V-6 moves it in and around traffic quite easily. Routine service has kept it in tip top shape and with less than 120k miles on it, we hope it is the last new car we will ever have to buy! This is Bernie's daily driver, I get to drive it on occasion, like when it needs gas, or the tire pressure is low, or it wiggles and wobbles and needs some other kind of attention!
